Profile

Certified Full Stack Developer with 5.9+ years of experience in building scalable enterprise applications using Java Spring Boot, .NET MVC, and Angular. Skilled in developing microservices, optimizing APIs, re-engineering legacy systems, and delivering high-quality releases using Agile practices. Passionate problem-solver with 600+ LeetCode solutions and strong expertise in SQL, and DevOps tools like Git, Swagger, and Postman. A fast learner and proactive contributor who bridges business needs with modern technology solutions.

Professional Experience

Technology Analyst, Infosys Ltd

09/2022 – Present | Hyderabad, IN

- Led full-stack development for enterprise applications using Java Spring Boot, Angular, and SQL Server.
- Designed and developed **RESTful microservices** for scalable and maintainable backend architecture.
- Integrated **Power BI** dashboards and analytics services to enhance data visibility for business users.
- Improved system performance by implementing optimized SQL queries and asynchronous data handling.
- Collaborated with product owners and QA in Agile/Scrum environments, delivering features in sprint cycles.

Senior Systems Engineer, Infosys Ltd

09/2021 - 09/2022 | Hyderabad, IN

- Engineered and integrated microservices to handle critical data flows and reduce API response times by 30%.
- Created dynamic and reusable UI components using **Infragistics** for enhanced user experience.
- Wrote and optimized complex stored procedures, improving database efficiency and reliability.
- Applied unit testing, API validation and CI/CD practices for continuous delivery.

Systems Engineer, Infosys Ltd

09/2019 - 09/2021 | Hyderabad, IN

- Built and maintained web-based enterprise applications using .NET MVC, WCF Services, and SQL Server.
- Implemented frontend features using JavaScript, jQuery, HTML/CSS, and Infragistics UI controls.
- Created backend services and data access layers, including complex stored procedures and data handling logic.
- Participated in Agile ceremonies including daily stand-ups, sprint planning, and retrospectives.

Projects

DPS NXT

A next-generation re-engineering of the Deal Pricing System, built to enhance performance, scalability, and user experience for business users involved in project pricing and deal evaluation. Application architected to include streamline features along with robust, user-friendly components.

SERVICE STORE

An enterprise-level application crafted to provide a centralized platform for accessing and managing service-related information across the organization. It consolidates various service offerings, intellectual property details and presents them in a structured, easily retrievable format.

DEAL PRICING SYSTEM (DPS)

A critical enterprise solution designed to streamline and optimize the budgeting process for incoming business projects. This system empowers business stakeholders to create and compare multiple deal scenarios, enabling strategic decision-making for project onboarding.

Skills
